

Alton Acres Summer Computer Lab

Volume 1, Issue 1

August 7, 2014

Special points of interest:

- Alton Acres Summer Computer Lab
- Abcya.com
- Jeopardy Anyone?

Computer Village and the Alton Acres Housing Authority united for the 2nd consecutive year.

The summer computer lab focused on the age groups from 2nd to 5th grades during a 3 week period.

The class studied identifying computer parts with consideration directed at how to properly operate a computer from start-up to shut down. We utilized educational websites like ABCya.com and

JeopardyLabs focusing on the components of math (addition, subtraction, division and multiplication). The structured learning also consisted of power point games utilizing the same math components. The culmination of the program consisted the issuing of certificates and attendance prizes

Computer Based Learning Helps

ABCya.com is the leader in free educational kids computer games and activities for elementary students to learn on the web. All children's educa-

tional computer activities were created or approved by certified school teachers. All educational games are free and are modeled from primary grade lessons and enhanced to provide an interactive way for children to learn. We utilized this website

to teach our young participants a fun interactive way to quickly answer addition, subtraction, multiplication and division problems through individual and interactive competitive games.

JeopardyLabs
This is...not PowerPoint!

JeopardyLabs allows you to create a customized jeopardy template without PowerPoint. The games

you make can be played online from anywhere in the world. Building your own

jeopardy template is a piece of cake. Just use our simple editor to get your game up and run-
