Computer Village Teaches Networking Basics

Computer Village Instructor
Robert Lewis

Computer Village instructors Robert Lewis and Nick Curlett, teach a continuing series on networking and computer connectivity. This session focused on the

correct networking terminology and hands on instruction inclusive of actually building a peer to peer shared network and creating Cat5 cables. Students also assisted in the instruction of the class reinforcing the retention and accountability aspects of learning the selected material. At the conclusion of the class students were allowed to keep the Cat5 cables and received a certificate of participation. This segment of instruction was

sponsored by the Juvenile detention Center.

Networking Resources

Are you interested in networking? If so here are some websites you can connect to and continue to follow us on our website for future

classes.
